About Me

My path into food science began with a curiosity for applied chemistry at technical high school and evolved through Bachelor's and Master's degrees in Viticulture and Oenology, followed by biosensor research in France. A career-defining pivot occurred during my Ph.D. when I took over our laboratory's sensory panels. That transition led me to Massey University's Feast Lab in New Zealand reporting to Prof. Joanne Hort, where I led industry consumer research and served as Principal Investigator on grants integrating virtual environments (VR), AI/NLP thematic analysis, and implicit consumer testing. Immersing myself in New Zealand reshaped both my personal relationship with food—cooking from scratch—and my leadership philosophy: bridging diverse cultures while guiding team members so everyone feels genuinely seen, valued, and empowered. Returning to industry as R&D Manager at Giotto Consulting in Italy provided a pragmatic reality check on research market value. Crossing countries, disciplines, and sectors has made me an adaptable researcher who bridges technical food engineering, qualitative consumer insights, and empathetic team leadership.

Education

Ph.D. in Food Engineering and Biotechnology 2019 – 2023

Free University of Bozen-Bolzano, Italy

Thesis: Advances in profiling and preserving the identity of wines: sensory and chemometric approaches.

Master Degree in Viticulture, Oenology and Wine Market 2016 – 2019

University of Udine, Italy

Thesis: Construction of platforms for ultrasensitive real-time detection of *Brettanomyces bruxellensis* in wines.

Bachelor Degree in Viticulture and Oenology 2012 – 2016

University of Udine, Italy

Academic & Professional Experience

R&D Manager Oct 2025 – Present

Giotto Consulting Srl Unipersonale, Italy

- Author technical R&D proposals, experimental designs, and data-driven strategies for corporate food and beverage clients across Europe.
- Translate technical analytical data and consumer requirements into actionable solutions for industrial stakeholders.
- Develop digital tools and data-management solutions to improve analytical workflows and operational efficiency.

Research Officer (Sensory & Consumer Science) Sep 2022 – Sep 2025

Food Experience and Sensory Testing Laboratory (Feast) - Massey University, New Zealand

- Led major research initiatives connecting industry clients across New Zealand with international academic partners.
- Advanced the lab's technological capabilities by designing immersive virtual reality (VR) environments and upgrading existing testing infrastructure.
- Engineered custom software tools to streamline in-house sensory data collection for commercial industry projects.
- Served as Principal Investigator for "The Food Metaverse" project, evaluating consumer emotional responses within virtual environments.
- Served as Principal Investigator for the "Rapid Lexicon Development" initiative, creating novel methodologies to evaluate innovative food products.

Research Master Degree Project

Aug 2018 – Dec 2018

Université de Technologie de Troyes (UTT), France

- Developed biosensing platforms for the sensitive detection of the wine spoilage yeast *Brettanomyces bruxelensis* using LSPR, SERS, and QCM transduction techniques.
- Engineered LSPR- and QCM-based biosensors for the rapid detection of gliadin traces in complex matrices.

Industrial Winemaking & Production Operations

2015 – 2019

Assistant Winemaker | Ca' di Rajo, Sutto Wine, San Simone, Barone Ricasoli (Italy)

- Managed industrial-scale vinification workflows, fermentation controls, and real-time quality monitoring during peak harvest operations.
- Developed practical expertise in food safety, process optimization, supplier standards, and operational risk management within commercial production environments.

Teaching, Mentorship & Student Supervision

- **International Student Supervision:** Supervised undergraduate research project cohorts from the Singapore Institute of Technology (across two consecutive academic years) and hosted exchange students from Jiangnan University (China).
- **Degree Thesis Co-Supervision:** Co-supervised one Master's student and one Bachelor's student at the Free University of Bozen-Bolzano, guiding experimental design, chemometric data analysis, and thesis preparation.
- **Ph.D. & Technical Mentorship:** Provided technical mentorship and experimental protocol guidance to Ph.D. candidates at Massey University's Feast Lab (co-authoring high-impact publications in *Food Quality and Preference*).
- **Academic Teaching Assistance:** Delivered laboratory practical demonstrations and assisted course professors during lectures in oenology and sensory evaluation at the Free University of Bozen-Bolzano.

Recent Peer-Reviewed Publications (10 Most Recent)

Bibliometric Summary: 15+ peer-reviewed articles | 238 citations | h-index: 9 | i10-index: 8

Grants, Funding & Proposal Writing

- **MURF Research Grant (2025):** *Principal Investigator (\$24,800 NZD awarded)*. "Developing a rapid lexicon development methodology for use with innovative food products." Pioneered a high-ecological-validity Home-Use Testing (HUT) method combining AI-assisted thematic analysis, Natural Language Processing (NLP), implicit Response Time Tasks (RTT), and consumer cognitive segmentation for functional beverages with industry engagement (Fonterra, FoodHQ).
- **REaDI Research Seed Fund (2024–2025):** *Principal Investigator (\$5,000 NZD awarded)*. "The Food Meta-verse: exploring consumer insights." Executed cross-cultural VR consumer studies (Indigenous Māori and NZ-European cohorts) utilizing Meta Quest 3, Whisper-X transcription, and NVivo qualitative coding.
- **Competitive Grant Proposal Preparation:** Authored a Marsden Fund proposal as Principal Investigator on immersive virtual dining environments, co-investigated a secondary Marsden Fund submission, and contributed to European regional grant applications.

Certifications & Advanced Training

- **Certified Sensory Project Manager:** Italian Society of Sensory Science (SISS) — Advanced professional training in sensory project design, panel management, and consumer insights.
- **Design of Experiments (DoE):** University of Genoa — Specialized coursework in statistical experimental design, factorial modeling, and process optimization.
- **Advanced Mass Spectrometry Training:** Specialized training in high-resolution mass spectrometry, compound identification, and spectral data processing.
- **IELTS Academic Certification (C1 Level):** Overall Band Score 7.0 (Certified 2023).

Technical, Programming & Leadership Skills

- **Sensory & Consumer Methods:** VR tasting room design, implicit Response Time Tasks (RTT), AI/NLP qualitative analysis, sensory lexicon development, Home-Use Testing (HUT), affective/descriptive panel training.
- **Analytical Instrumentation & Chemometrics:** GC×GC-ToF-MS, GC-MS/MS, HPLC-DAD/FLD/MS, multivariate statistical analysis, chemometric modeling, and multi-block data fusion.
- **Programming & Data Science:** R & RStudio, Python, LaTeX, HTML, CSS, JavaScript, React, TypeScript.
- **Languages:** Italian (Native), English (Full Professional Proficiency / C1 Certified, IELTS 7.0 – 2023).

- **Leadership & Soft Skills:** Cross-cultural Team Leadership, Commercial R&D Strategy, Grant Writing & Management, Academic Mentoring, Stakeholder Alignment.

Civic Leadership & Personal Interests

- **Civic Leadership & Emergency Response:** Vice-Chief of Municipal Civil Protection (*Protezione Civile*) — Active leadership in local emergency management operations, flood relief interventions, and specialized disaster response training.
- **Culinary & Fermentation:** Cooking from scratch, artisanal food preservation, and oenology.
- **Outdoors & Well-being:** Hiking, photography, and digital technology exploration.
